

Re: Ralph C. Fey, AIA Architects

To Whom It May Concern:

It is my pleasure to recommend the services provided by Ralph C. Fey, AIA Architects of Doylestown, Pennsylvania. RCFA has done excellent work on our projects, most notably converting the 20,000sf historic human centrifuge into a museum and 1,200-person event space. This is the facility designed and build to test astronauts in high "G" force and "0" gravity. Our national heroes Allen Sheppard and John Glenn trained in the centrifuge. In addition to the main space, Ralph's team designed a series of other spaces over the past 4 years, including conference room renovations, office space, new restrooms, observation deck, Emergency exit stair project and our roof top deck design.

From pre-design to the finished product, Ralph and his talented, dedicated team were helpful, knowledgeable, and understanding of our needs. They were able not only to produce the best design but also to help us make decisions with excellent recommendations based on their past experience and expertise.

Without reservation, I strongly recommend RCFA to anyone considering hiring an architectural/design firm.

Sincerely,
Sam Cravero
