

# THE STEPHAN HOUSE INN

*New Hope's Inn for Downtown Lodging*

This letter is to express my recommendation for the architectural firm Ralph C. Fey AIA Architects. It has been my direct involvement with Mr. Fey, from both a business relationship and also a personal relationship through my community, that defines his passion and abilities.

The Stephan House Inn was a unique project that required the needs of a full service architectural firm to clearly express the project. The approval process for such a project needs - construction drawings, perspective drawings and public presentations were done with efficiently and professionally.

I am also a design/build contractor and have 25 years of experience in the construction industry. The key to any successful job (and to that matter success in life) is the need for communication.

Many architects can draw, but not all can communicate with the ease and knowledge that Mr. Fey and his firm showed me. His ability to work with me, through many of the Stephan House Inn's many design features and challenges, is clearly expressed through the project's final completion.

I also am biased to Mr. Fey, as his commitment to my community - New Hope, has been over and above what is required of a volunteer. At the same time, that's what's needed in order to continue to grow and "build" a community, which Mr. Fey has been doing one structure at a time!

Sincerely,

*Glen Stephan*
